

SuperConnector clearing house service for employers.

SuperConnector
for employers

iress.com/super-connector

Tell me how it will help me

SuperConnector's clearing house service helps you to meet legislative and compliance requirements by providing secure data transmissions between employers and super funds.

This means that from one central portal you are able to pay superannuation contributions to multiple complying super fund(s) for their employees, add and manage employee data, view your transaction history and access reporting.

Accredited gateway operator

SuperConnector is an accredited gateway operator that has met the relevant criteria to operate in the Superannuation Transaction Network.

SuperStream compliant

Enables you to meet the SuperStream obligations in accordance with the Superannuation Data and Payment Standards 2012 administered by the Australian Taxation Office.

Data entry

Supports you regardless of whether or not you use payroll software. The entry of employee and contribution data is supported in the SuperConnector portal via a file upload and/or manual entry.

Multi-fund support

Supports contributions made to both APRA regulated superannuation funds and SMSFs.

Simplified payments

Removes the need to provide a payment reference with each EFT payment made to SuperConnector.

Safe & secure

Provides a fully hosted and managed service onshore in Australia, together with ISO/IEC 27001 certified information security.

Can you break it down for me?

After you log into the SuperConnector portal, you can enter employee and contribution data through a supported file upload, via manual entry, or a combination of both.

Loading data

Allows you to drag and drop your SuperStream alternative file format (SAFF) file or copy a previous period's approved data.

Making payments

Provides the option for EFT, BPAY and direct debit, plus the ability to choose who authorises payments—reducing potential payment matching issues and/or payment rejections.

Approvals

Supports Contribution Batch approval by a different user.

Error notification

Validates data prior to reaching a superannuation fund, which can assist in reducing potential errors. It provides notifications of errors or rejected contributions, and allows for funds to automatically flow back into your bank account.

Reporting

Provides the visibility of your contribution activity overtime—with a detailed audit trail, built-in reporting that gives you insights by employee and destination funds.

What about service and support?

We understand providing great service and support goes hand-in-hand with delivering great software.

We pride ourselves on our thorough and timely implementations, reliable and scalable hosting services, robust back-up and recovery procedures, and ISO/IEC certified information security management.

How does Iress stack up as a technology partner?

Every day, more than 9,000 financial services businesses use our software to make better decisions and deliver better results. We know they don't just expect software that works, they also want a technology partner that works with them. Leveraging our industry knowledge and global experience working with clients just like you, we design, develop and deliver creative, reliable software that does what you need it to. At Iress, we believe technology should help people perform better every day.
